

Who are we?

ApartDirect offers short- & long-term rental apartments in Stockholm. In what way do we differ from hotels? Let's just say our apartments feel more like home. We value privacy, comfort, and cost-efficiency. With such apartments as ours, you can stay for both short- and long term. Our apartments are suitable for business travelers, tourists, and families.

We are a family-owned apartment rental company that has been up and running since 2012. Our company grew out of the growing demand for business and leisure travelers to find alternative accommodation to hotels.

Why Nattaro Labs?

A couple of years ago we, at ApartDirect, have experienced certain issues with the bedbugs in our housing. We have tried different companies as well as various products with different price ranges. But the solution was either too expensive either not permanent or effective. After we have contacted Nattaro Labs everything has changed. Starting from an easy installment in our various apartment buildings, to complete safety to all our customers. Since we haven't experienced any difficulties or problems with bedbugs at all.

We strongly recommend Nattaro Labs and its products for a permanent and preventive solution against all types of bedbugs. Material is easy to install and dispose of, almost maintenance-free, and a long-term solution for a great price. Now we have Nattaro in a number of our apart-hotels and in the future, we would want to have it in all our buildings. Thank you, Nattaro Labs!
